

§ 266.404

40 CFR Ch. I (7-1-07 Edition)

EPA, MPCA and as appropriate the County Agencies.

(b) USFRS is the only entity which may propose to EPA to add a person as a transporter to the USFRS XL Project.

(c) USFRS and Pioneer Tank Lines are approved USFRS XL waste transporters. USFRS may propose to EPA to add other persons as USFRS XL waste transporters provided USFRS complies with the requirements of this section. USFRS will conduct a preliminary evaluation of any person who it proposes to add as a USFRS XL waste transporter. As part of that preliminary evaluation USFRS will ascertain whether the transporter has a valid EPA identification number, a valid Minnesota hazardous materials registration ("Minnesota registration") and a satisfactory safety rating from USDOT within the last year.

(d) After successfully completing the activities identified in paragraph (c) in this section USFRS will provide EPA with the name of the transporter, the unique USFRS client identification number for the transporter, the results of its preliminary evaluation identified in paragraph (c) and other information as EPA may require to determine if that person may participate in the USFRS XL Project. USFRS will propose for inclusion into the USFRS XL Project only those person(s) who have a satisfactory safety rating from USDOT. EPA's approval shall be effective within twenty one days of its receipt of USFRS's written notice proposing to add a person to the USFRS XL Project unless EPA, within that time period, provides USFRS with a written notice rejecting such person.

(e) After receiving the approval of EPA, MPCA and as appropriate the County Agencies USFRS shall notify the person in writing that it is approved for participation in the USFRS XL Project. USFRS will obtain from that person a copy of the signed USFRS XL waste FPA and a certification that it has been trained by USFRS on the proper handling of USFRS XL wastes and understands its responsibilities under this subpart O.

(f) USFRS will allow only USFRS XL approved transporters to transport USFRS XL wastes. A person's partici-

pation in this USFRS XL Project is effective after it receives the approval of EPA, MPCA and the County Agencies, as appropriate, and on the date that USFRS receives the signed USFRS XL waste FPA and certification. A USFRS XL waste approved transporter becomes a USFRS XL waste transporter when it first transports or accepts for transport USFRS XL waste.

(g) USFRS will require a USFRS XL waste approved transporter or USFRS XL waste transporter to notify it of any change in its rating from USDOT, its Minnesota registration or its EPA identification number. USFRS will notify EPA, MPCA and, the appropriate County Agencies in writing of any such changes. EPA will notify USFRS in writing of any additional information or steps that may be required as a result of such changes.

§ 266.404 USFRS requirements related to the development, use and content of USFRS XL Waste Training Module.

(a) USFRS will develop, implement and maintain a USFRS XL Waste Training Module. USFRS will provide this training module to every person who applies for participation in the USFRS XL Project. USFRS may use any recorded communication media that is appropriate for communicating the requirements of this subpart (e.g., printed brochures, videos, etc.).

(b) The Training Module will, at a minimum, identify the hazards presented by the USFRS XL waste; for generators, explain how to handle the installation and replacement of the ion exchange resin canisters and the pre- and post-resin filters; and explain the requirements imposed on the generator or transporter pursuant to this part.

(c) USFRS shall submit this training module to EPA for approval prior to accepting the first shipment of USFRS XL wastes.

§ 266.405 USFRS requirements relative to the development, use and content of USFRS XL Waste MSDS.

USFRS will develop a USFRS XL waste material safety data sheet (MSDS) or similar document which meets the requirements of this subpart. USFRS will provide a copy of the

Environmental Protection Agency

§ 266.408

USFRS XL waste MSDS to every person who applies for participation in the USFRS XL Project. USFRS will ensure that the USFRS XL waste MSDS prominently instructs individuals in the proper handling and emergency response procedures for spills or leaks of the USFRS XL wastes.

§ 266.406 Waste characterization.

(a) *Submission of USFRS XL Waste Application Form by USFRS XL Waste Generator.* A person who proposes to participate in the USFRS XL Project as a generator of USFRS XL wastes must properly identify the wastes and processes which contribute to the production of the USFRS XL waste at its company. For the purposes of this subpart O it shall identify only those waste streams which meet the F006 listing and shall identify them on the USFRS XL waste application form. It shall complete and submit to USFRS the USFRS XL Waste Application Form. It shall update and submit to USFRS the XL Waste Application prior to changing any process which contributes to the USFRS XL waste it generates.

(b) *USFRS Waste Profile Analyses.* For any person which USFRS proposes to add to the USFRS XL Project as a generator, USFRS will perform a waste profile analysis of the waste stream(s) and process(es) which will contribute to the USFRS XL waste at that company. USFRS will update such analyses whenever a USFRS XL waste generator notifies USFRS of a change or modification to its waste stream or process contributing to its USFRS XL waste. USFRS will include in the waste profile analysis a complete chemical analysis of the waste stream(s) and a determination of its compatibility with the ion exchange resin process, canisters and filters. USFRS shall complete such analysis in accordance with the testing methods identified in the waste analysis plan contained within its RCRA hazardous waste permit. USFRS shall assign to each generator a unique customer identification number and waste profile number.

§ 266.407 USFRS XL waste identification, handling, and recycling.

(a) USFRS XL waste will be denoted by the hazard waste code XL001 while it is handled by the USFRS XL waste generator or transporter. At the USFRS facility, the USFRS XL waste will be denoted by the waste code(s) it would have had at the generator but for its characterization as USFRS XL waste (i.e., F006 and any other applicable characteristic waste code). USFRS and others who may receive residuals from the USFRS XL waste will handle the USFRS XL waste and residuals according to the wastes code(s) it would have had at the generator (i.e., F006 and the appropriate characteristic hazardous waste code) and not according to the XL001 designation. USFRS shall handle the USFRS XL waste at its facility in accordance with its State issued RCRA hazardous waste permit and any applicable federal requirements.

(b) USFRS may not accept any customers into this Project unless and until it has arranged for recycling of the metals contained in the XL001 wastes it receives. USFRS shall continue to recycle the metals contained in the XL001 waste it receives throughout the duration of the XL Project.

(c) USFRS shall identify a spill response coordinator at its facility. This person shall be responsible for coordinating the proper response to any spill, leaks or emergencies of USFRS XL wastes at the generator or during transport. He will also be responsible for receiving the calls from the generators and transporters required by this subpart O for such spills, leaks or emergencies.

§ 266.408 Accumulation and storage prior to off-site transport.

A USFRS waste generator may store its USFRS XL waste on-site for less than 90 days, provided it complies with the following:

(a) *Condition and use of containers.* Except as provided in paragraph (e) of this section, the USFRS waste generator it will store the USFRS XL waste in the USFRS water treatment resin canisters and filter containers. At the time it places the resin canister or filter containers in storage it will ensure
